PROJECTS

Hike The Trail ATX | Front End Developer

https://github.com/cldominy/project-1 | https://cldominy.github.io/project-1

- This website dynamically generates up to 20 Austin trails in a list for you to click through.
- A user can select criteria to limit the trails, either based on length of the trail or on the difficulty of the trail. Once a trail is clicked on, the web-page dynamically updates with a picture of the trail, trail information, and the location on Google Maps.
- Tools/Languages: The Hiking Project API, Google Maps API, Moment.js, Materialize CSS framework, jQuery, Javascript, HTML & CSS

WORKING EXPERIENCES

Samsung SDSA; Austin, TX   **2019 - Present**

Logistics Specialist CL2

Perform appropriate administrative and operational research to support proposal and contract development. Teach customers about Samsung materials, classification and dispatch for sites. Maintain the flow of communication with the areas of Customer Service, Procurement, Planning, in order to ensure compliance with the objectives of the area. Inform stakeholders regarding any contingency, return or rejection of material product in a timely manner. Manage AP and AR billing and issue invoices.

- Garnered a promotion to a leadership role by outstanding work performance.
- Saved profits for clients by logistic knowledge and data analysis.

SeaSpray Perdido Key; Perdido Key, FL   **2018**

Data Manager & Web Content Manager

- Solved database page issues and malfunctions in order to make the source user-friendly.
- Provide data management support to users.
- Conduct content audits to identify gaps and redundancies in the site content.
- Produce maps and visualizations of the site to help staff understand the structure and function of the website.

SeaSpray Perdido Key; Perdido Key, FL
